

GUNLINE TOOLS

FOR
GUNSTOCKERS

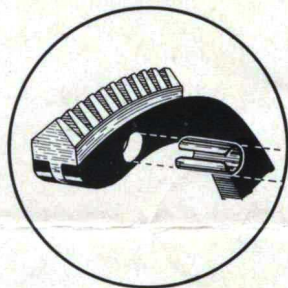

they are here!

ALL-NEW

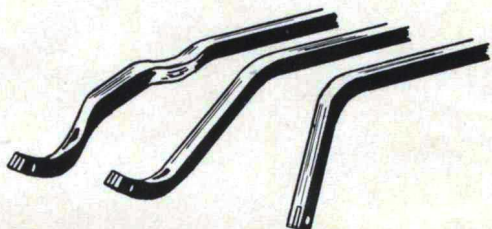

MOST COMPLETE LINE OF **CHECKERING TOOLS**

Nothing Like It!

This is a new concept in cutter design and has proved to be the smoothest and fastest cutting checkering tool. You can cut easily by both forward or backward movement, whether cross-grain or with-the-grain, groove-forming or cross-hatching. You will gain confidence in the superior method of cutting after using it only a few minutes. New heat-treatment producing carbide-like surface keeps tool in service far longer. No need to say good-bye to a slightly dull cutter—can be honed conveniently. The unique spring-pin and precision positioning end the nuisance of loose cutting heads and make replacement simple. Insist on GUNLINE TOOLS.

HANDLE STYLES

H-1R (right handed)

H-1L (left handed)

H-2

H-3

2-EDGE SPACER—used to space one groove at a time on the checkering pattern. One edge cuts a new groove while the second rides in a previously cut groove. Available in 16, 18, 20, 22 and 24 lines per inch.

3-EDGE SPACER—useful in spacing two grooves at a time, or spacing one groove at a time with two edges riding in previously cut grooves for greater accuracy. Made in 16, 18, 20, 22 and 24 lines per inch.

SKIP-CHECK—designed for spacing double width lines or the fancy French Checkering and is available in five standard sizes.

BORDER-VEX—used in cutting an attractive convex border around the checkering pattern. One edge of the tool rides in the scored outline while the second cuts the border on the outside of the pattern.

V-EDGER—a single-edge tool used to score the outline and guide lines of the checkering pattern, and to deepen the checkering as well as to finish the outline where only a single groove is desired. This is made in 60° and 90°.

POINTER-LONG—a fine-toothed finishing tool used to bring the diamonds of the pattern to a point and to finish the outline. Available in 60° and 90°.

POINTER-SHORT—a fine-toothed finishing tool used on patterns requiring short radius maneuvering. Also made in 60° and 90°.

VEINER—used for outlining and for tight corner work particularly on more elaborate patterns and carving.

SHARPENING STONE—a three-corner fine-grit hone used to dress the cutting heads.

SPRING RETAINER PIN—(See illustration above.)

SPEC C-55 Series

The new GUNLINE CHECKERING TOOLS have been engineered for the precision requirements of professional craftsmen. Even the inexperienced will find these tools all that they could desire in simplicity of operation.

- ★ advanced cutter-head design — smooth cutting
- ★ scientific heat-treatment — last far longer
- ★ positive spring-pinned heads — no loosening
- ★ rear-vision design — more confident cutting

DURABLY PACKAGED SETS

"LEADER" SET—2-Edge Spacer, Border-Vex, V-Edger, Pointer-Long, Rule with Gauge, Full Instructions. 90° VE and PL unless otherwise specified. LE-16, 18, 20, 22 or 24.....\$8.95 SET

"CAMP PERRY" SET
2-Edge Spacer, 3-Edge Spacer, Border-Vex, V-Edger, Pointer-Long, Veiner, Rule with Gauge, Full Instructions. 90° VE and PL unless otherwise specified. CP-16, 18, 20, 22 or 24.....\$13.95 SET

"E-Z CHECKIT"—This tool is equipped with 4 spring-activated guides, #16, 18, 20 and 22, making it possible to do a variety of checkering jobs quickly and easily. The single-edge coarse and fine replaceable cutting heads are designed for optimum efficiency. You will be surprised how simple this tool is to operate. A rule and instructions are included making this a complete kit at a price that is economical even for one or two checkering jobs.

E-Z-C\$4.95 KIT
Extra Coarse or Fine Cutting Heads ZC or ZF.....\$1.00 EACH
